As life changes we all need extra space. The Grove all timber cabin provides an attractive sustainable solution.

If you are looking to create a truly beautiful space for any purpose you choose, the Grove does this so well. Be it a workshop, craft room, sleep-out, office or bach. Potential applications are endless.

The cabin's doors are positioned to allow for plenty of natural light, allowing you to work, relax or craft in comfort. The aluminium doors and windows are double-glazed with toughened glass. They are secured with tough 304 grade stainless steel hardware.

Made from kiln-dried FSC certified Scots pine. The walls are tongue and groove solid 28mm thick timber. This provides natural insulation and strength.

The floor and roof are tongue and groove 18mm Scots pine, completing the all round solid timber look.

Features

- Constructed from kiln dried, FSC certified, Scots Pine
- Double-glazed toughened glass aluminium doors included
- Arrives unfinished - paint or stain yours after completion
- Tongue and groove construction for durability and stability
- Doors to let in plenty of natural light
- Premium roof asphalt shingles included
- Thick 28mm walls for natural insulation
- 304 grade stainless steel hardware
- 5 year manufacturer's warranty

Foundation and Site Information

The cabin must be built on a completely level surface. A poured concrete slab is best, as are concreted wooden piles. Other options are available so please contact us to ask for further information.

The site preparation is at the buyers cost however we are happy to provide a site inspection and look after the foundation preparation for you. As every site is different this is priced according to each job.

Your kit includes the foundation framing to ensure your cabin is elevated above ground level.

You can choose to have us build your cabin using our professional builders, or you can choose to build it yourself. However we recommend that we build it for you. This way we can be 100% sure of the quality of the build. Our build prices are very competitive. If you choose to build yourself (DIY) then we will supply a full set of instructions.
